

Press Release

DFT Digital Film Technology and Cinevation Form Strategic Sales & Marketing Partnership

Weiterstadt, Germany – September 8, 2009

DFT Digital Film Technology, provider of high-end film and digital post production solutions that preserve, manage, and deliver your pictures, and Cinevation – the world leader in high end film recorders, today announce they have formed a strategic partnership.

Initially, this co-operation will focus on sales and marketing but may be further expanded to include other parts of the companies' operations in the future.

The partnership positions both companies to deliver complementary technology and products as well as end-to-end workflow solutions to the post production marketplace. The combined solutions will enhance the quality of deliverables for post production facilities worldwide.

“Our strategic agreement with Cinevation creates a powerful partnership for creating value within the industry,” comments Stefan Kramper, DFT Digital Film Technology Managing Director. “Together, we will provide the post production industry with enhanced, powerful and flexible solutions to improve ROI, image quality, and workflows.”

“DFT Digital Film Technology shares our commitment to delivering exceptional quality solutions,” comments Bjørn Sæterøy, CEO of Cinevation. “With our combined sales and marketing efforts and strengths we will provide post facilities with technology they can use to their best advantage.”

Together, DFT Digital Film Technology and Cinevation offer superior products and solutions that address a variety of different markets such as Digital Intermediate, Archival and Restoration, and Direct to Print applications.

DFT Digital Film Technology and Cinevation will be co-located in Booth 7.E39 at the upcoming IBC in Amsterdam, September 11-15, 2009.
