FKT > Slovak Film Institute invested in 4K film scanner

15/07/2014

## Slovak Film Institute invested in 4K film scanner

*Safe and gentle digitization of the national film heritage*

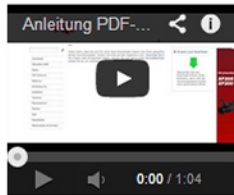

in real time. The precious footage is always treated safely and gently.

For the preservation and archiving of its audiovisual holdings, the Slovak Film Institute has (Slovenský Filmový ústav, SFU) the 4K film scanner SCANITY of DFT acquired (Digital Film Technology). As part of the project started in 2011, "Digital Audio Visual" the national film and video heritage for future generations is preserved with its help. In an end-to-end process, which includes the audio and infrared scan, the content is digitized
